

Dearest Trinity Hall MCR,

We are Homa Majd and Mia Kim; pursuing our PhDs in Biological Science (at the Medical Research Council) and Educational Psychology (at the Faculty of Education) respectively.

We want to join the MCR committee 2015-2016 as your Academic Officers to:

- First and foremost improve the SCR (the fellows' community) – MCR relationship by:
 - organising mini-seminars and talks with interdisciplinary themes so students AND fellows talk about their research and their field of interest and speciality, to encourage our network and create collaborative opportunities
 - having SCR members more often in our gradhalls which also encourages us to invite our supervisors to our formal dinner as part of the college offer to the graduate students
- Creating an online directory of the MCR members with their major and their research. You might end up knowing someone in your department from Trinity Hall. How much do we miss by not knowing what the lovely MCR members do?!
- Continue the nice traditions of organizing the writing/study groups and the Marshall McLuhan Symposium!

We need your support; to support the MCR academic life!
